A machine with a strong personality and an eye-catching design, that highlights Dalla Corte's technological innovations and the baristas' work, introducing them into a "zero limits" dimension to express themselves at their best.

With the Fixed Water Flow, the flow rate is adjustable in grams per second directly on the new digital touchscreens. Every single group can have a different flow rate - from 4 g/s to 10 g/s - fixed throughout the entire extraction.

With the Freestyle Water Flow, each lever on the side of Zero's brewing units is provided with 4 steps, every step is pre-set with a specific flow rate (4-6-8-10 g/s). Welcome to a "zero limits" dimension.
